

Carbon Reduction Plan

Supplier Name: APLX LTD

Publication Date: 04/06/26

Commitment to achieving net zero

Audit Partnership Limited is committed to achieving net zero emissions by **2045**.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2024/25	
Additional details relating to the baseline emissions calculations:	
2024 has been chosen as a baseline year as this is the first year where we had a head office open following the Covid 19 pandemic and the year business travel was at a normal level. Note this is our first year of reporting.	
Baseline year emissions:	
Emissions:	Total (TCO2e)
Scope 1	0.42
Scope 2	0.76
Scope 3 – Breakdown Below:	131.06
4. Upstream transportation and distribution	0
5. Waste generated in operations	0
6. Business Travel Inc Hotel Stays	86.41
7. Employee Commuting – We are fully remote working from home. WFH conversion applied	44.65
Total Emissions:	132.24

Current emissions reporting

Current Year: 2025/26	
Additional details relating to the current emissions calculations:	
<p>In January 2026 APLX bought Novus Analytics in the United States of America. This has contributed to increased international travel through flights and additional hotel stays. National travel has slightly decreased vs the base. We are now into the 2nd year of our office open and the wider adoption has led to increased energy consumption. Employee numbers in the UK have slightly increased hence the increase in WFH conversion number.</p>	
Baseline year emissions:	
Emissions:	Total (TCO2e)
Scope 1	1.36
Scope 2	1.2
Scope 3 – Breakdown Below: 4. Upstream transportation and distribution 5. Waste generated in operations 6. Business Travel Inc Hotel Stays 7. Employee Commuting – We are fully remote working from home. WFH conversion applied	145.98 0 0 100.2 45.78
Total Emissions:	148.54

Carbon reduction projects

Completed carbon reduction initiatives

Given the nature of the services Audit Partnership provides, our Carbon footprint is very small, and we look to continue to keep our emissions low as we grow as a business. The following environmental management measures were in place during the 2024 baseline.

Flexible working policy – There is no requirement to commute into the office due to a flexible working from home policy

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Adding solar panels to our UK office – Whilst our scope 1 and 2 emission are small, we are hoping this will go some way to reducing or being net zero on these.
- Green energy providers – We will review our energy providers and see if we can choose green options to reduce our carbon footprint
- Carbon Offset Scheme – Review schemes available to offset the small of emissions we do produce
- International travel review – As our business is growing and we are expanding in locations we will continue only essential travel is taken.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans using the appropriate government emission conversion factors for greenhouse gas company reporting.¹

Scope 1 and Scope 2 emissions have been reported in accordance with the GHG protocol², and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

Matthew Hill, Global Business Development Director

Audit Partnership Limited
